Tracktion

This guide shows you how to set up the D400 in Tracktion. All pictures provided were taken with Tracktion 5 but it is also applicable to most other Tracktion versions.

All files mentioned in this guide can be found on the USB drive, in the Asparion Configurator installation folder or on our website.

If you are having trouble with anything in this guide, please contact us via our website www.asparion.de/contact and we’ll immediately help you.

Step 1:

- Select the Tracktion preset

  How to select a preset is described in the main manual.
Step 2:

- Open Tracktion
- Click on **Settings** and select **MIDI Devices**
- Enable all devices containing **D400**
Step 3:

- Go to **Control Surfaces**
- Select **Mackie Control Universal** and set **D400** as Input and Output
Step 4: (optional)

- If you want to connect more than one extension, you should also set **Extenders** to 1
Step 5: (optional)

- Click **MIDI Learn**
- Here you can assign functions to every button as you desire
Step 6: (optional)

- If you want to connect more than one extension, select the **Mackie Control Universal XT and D400 (2) as Input and Output**

  *If there is only one D400 showing up, you need to enable the extensions first. How you can do that is described in the main manual.*
