Bitwig

This guide shows you how to set up the D400 in Bitwig. All pictures provided were taken with Bitwig 3.3 but it is also applicable to most other Bitwig versions.

All files mentioned in this guide can be found on the USB drive, in the Asparion Configurator installation folder or on our website.

If you are having trouble with anything in this guide, please contact us via our website www.asparion.de/contact and we'll immediately help you.

Step 1:

- **Make sure your D400T firmware is v1.16 or higher**
  How to update the firmware is described in the main manual.
- **Select the Bitwig preset**
  How to select a preset is described in the main manual.

Step 2:

- **Extract and copy the folder "Asparion" to Bitwig**

  Windows:

  C:\Users\-yourName-\Documents\Bitwig Studio\Controller Scripts\

  Mac:

 /Users/-yourName-/Documents/Bitwig Studio/Controller Scripts

Step 3:

- Open Bitwig
- Click on **File->Settings**

Step 4:

- Go to **Controllers**
- Click **Add Controller**
- Select **Asparion** from the list

Step 5:
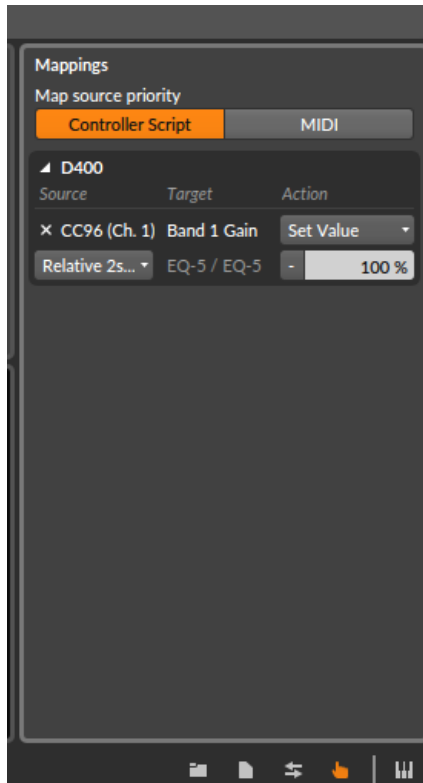

- Select **D400** as shown below

Step 6: (optional)

- To assign the buttons **1, 2** and ***** got to **File->Settings->Shortcuts**
- Click **Controller,** select the desired shortcut and click **+**
- Press the button to assign on the device

Step 7: (optional)

- The EQ rotary encoders can be assigned freely. To do that click on the hand symbol
- Click on any control element and then rotate the encoder on the device
 *Make sure to select "Relative 2s Compliment"*

Step 8: (Info)

- The LED ring encoders control the currently active functions. These are highlighted with a distinct color. Click on the six dot symbol to view the functions
- To switch the bank double click the arrow buttons on the device
- To reset parameter, click encoder

Step 9: (optional)

- If you want to connect more than one extension, you should redo step 4 and 5 but select the product with the correct number of extensions as shown below
  If there is only one D400 showing up, you need to enable the extensions first. How you can do that is described in the main manual.
